

## GENERIC SORTING

- Take out one member from each set out of a container
- Take the sensation
- Ask the child also to take the sensation
- Establish a place for a member in each set
- Tell the child the objects that look alike go there
- Wear the blind fold
- Feel the materials one by one and identify it
- Sort and place them in their respective place
- Repeat the process until all the members are sorted
- Remove the blind fold
- Visually check whether the members are sorted correctly
- Mix the materials and place it at random
- Establish a place where all the members of a set go
- Invite the child to wear blind fold and do sorting
